DLS 5 INT V1.63

Introduction

DSC is pleased to announce the release of V1.63 of the DLS 5 INT downloading software.

This software release includes some new features, as well as improvements to existing features and corrects some issues seen with V1.62.

Market Segments

Available to Europe, Middle East, Asia/Pacific, and Latin American professional installers to allow local and remote configuration of DSC products.
Main Features

Main Feature	Customer Benefit	Value
Account List Improvements	Sorting by column now sorts the entire database. Column positions and sizes will be stored for next launch.	DLS 5 UI can be customized by the customer based on desired account organization and workflow
Account Migration Wizard	Users can now migrate an account to a new panel/module type from the account right-click menu	Easily migrate all non-default settings to the new panel
Auto Detect PC-Link	DLS 5 will now detect changes to COM port configuration and ask if PC-Link connections should use that port	Save time and reduce complexity of COM port programming

| Main Feature	Customer Benefit	Value
Fixed Issue – Adding multiple key fobs	Fixed an issue seen when downloading multiple PowerG wireless keys to the panel	Multiple wireless keys can now be downloaded to the panel at once
3G/GS40XX Module Support	Customers can now program GS4005/3G4005 V1.1 and V1.2 using DLS 5 INT. Support added for upcoming GS4015/3G4015.	Allows local or remote programming of the latest Universal Cellular communicators

Compatibility

Note: Due to the .NET Framework V4.6 requirement, DLS 5 INT V1.63 is not compatible with Windows XP or Windows Vista. If you attempt to install DLS 5 INT V1.63 on an unsupported OS, or upgrade an existing DLS 5 INT install on Windows XP or Vista to V1.63, you will see the following error message:

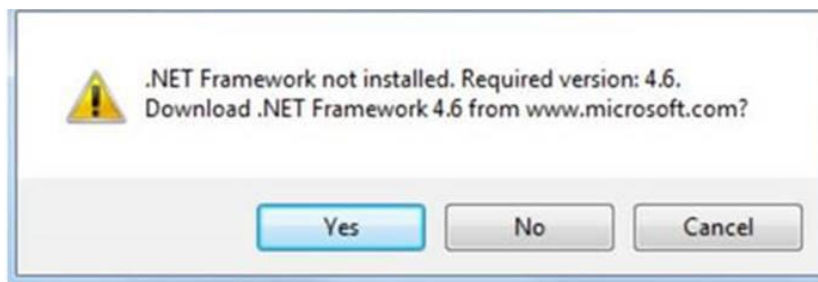

ERROR: Operating System not supported. You must have Windows 7 or higher to install this software. Exiting...

Installation

DLS 5 INT V1.63 is available for download from http://www.dsc.com/index.php?n=library&o=software&id=15#id15. Note that a professional installer login will be required to allow download of the software.

Users with existing DLS 5 INT installations can obtain the updated version by choosing the 'Check for Updates' selection from within the DLS 5 Help Menu.

During installation, you may be prompted to install Microsoft .NET Framework V4.6. After clicking 'Yes' on the dialog box below, the WebSA installer will install .NET Framework V4.6 before proceeding.

After the .NET Framework installation has completed, a reboot will be required to finalize the installation. After the reboot, re-run the DLS 5 INT installer and your DLS 5 INT installation will complete after checking to make sure that the .NET Framework was installed successfully.
